PRODUCT BROCHURE

Henso Biotech Limited is specializing in designing, producing, and distributing innovative skincare and advanced wound care solutions, including acne patches, microneedle patches, blister plasters, scar sheets, and advanced wound care dressings. Equipped with advanced production facilities, premium materials, and a skilled team, we ensure products meet the highest global standards, certified by GMP, CE, ISO and FDA.

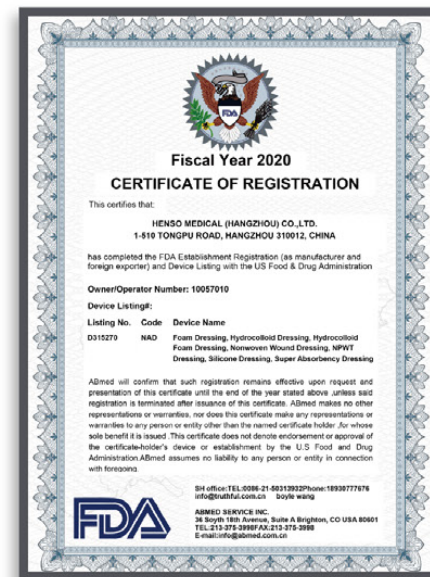

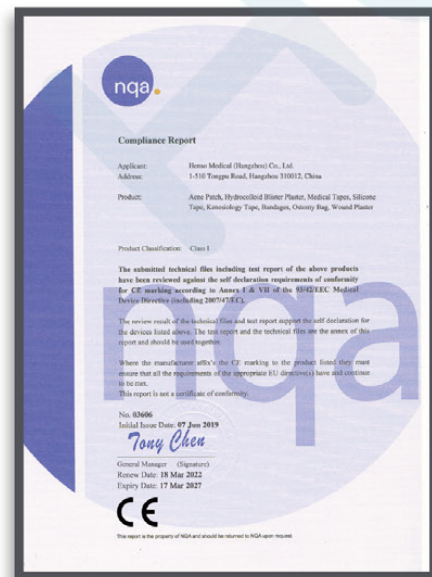

Our strength lies in customizable acne patches, offering tailored designs, formulas,

and packaging to meet unique client needs. Combining technical expertise with customer-focused service, we deliver reliable, high-quality solutions for both daily skincare and professional medical applications.

Dedicated to merging innovation with reliability, we empower individuals worldwide to achieve healthier skin and confidence through scientifically backed, premium-quality care.

We have obtained CE & ISO 13845 certificate and also registered at FDA of United States. With high quality, reasonable price and good service, our products were exported to most regions of the world, including United States, Europe, Southeast Asia, Africa, South America, Middle-East, Oceania and so on.

Founder's Philosophy:

Embracing Acne as Self-Expression

With nearly 20 years manufacturing experience in medical product, we understand the emotional impact of acne, especially on young people. Traditional patches are often invisible and unremarkable, failing to address the need for self-expression and confidence.

In July 2018, we introduced the world's first non-circular, non-invisible acne patch—Yellow Star. This design marked a shift from hiding to embracing, turning a common skin issue into a canvas for personal style. The product quickly gained popularity for its unique look and functionality.

Since then, we've continued to innovate—improving materials, introducing fun characters, collaborating with IPs, and creating new formulas. All while maintaining a focus on medical-grade quality and effectiveness.

Ultimately, we believe acne shouldn't be shameful. It's an opportunity for personal expression: a statement of fashion, attitude, and confidence. This philosophy extends beyond acne care to all skin concerns, empowering everyone to embrace their skin proudly and own your glow!

Pioneer in Personalized Acne Patches

From Made in China to Global Expression

Since launching the world's first patterned acne patch in July 2018, we have helped hundreds of brands quickly enter the young skin care market. We not only produce acne patches, but also create a skin care experience that can speak.

SINCE 2018

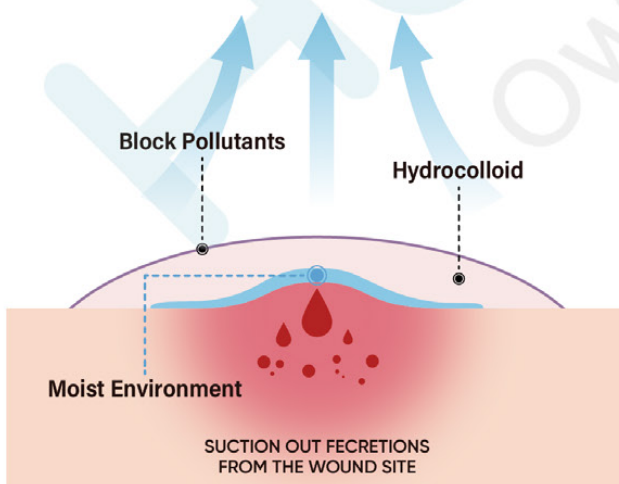

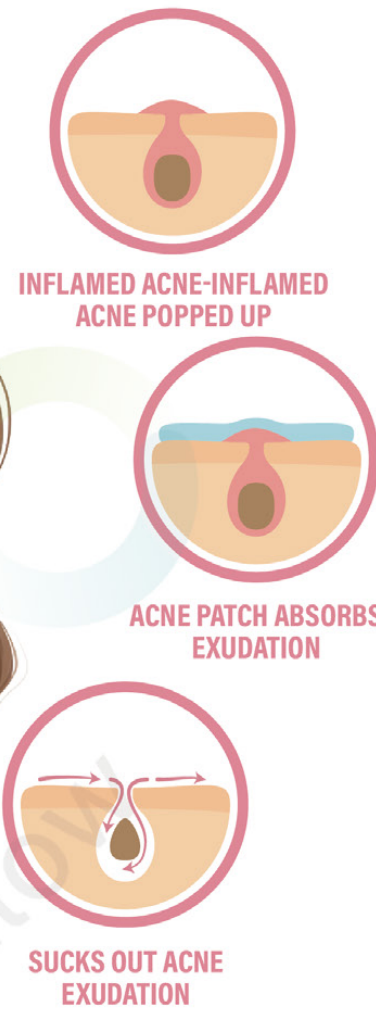

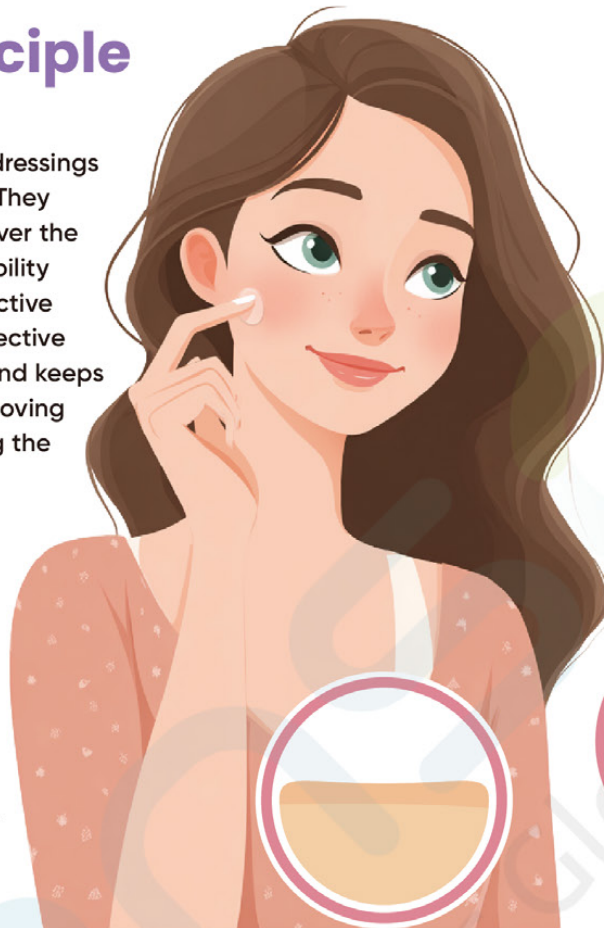

Working Principle

• BRIEF INTRODUCTION

Acne patches are hydrocolloid dressings designed to treat acne lesions. They maintain a moist environment over the wound, enhancing skin permeability and promoting faster, more effective healing. The patch forms a protective barrier that prevents irritation and keeps active ingredients in place, improving treatment efficacy and reducing the risk of scarring.

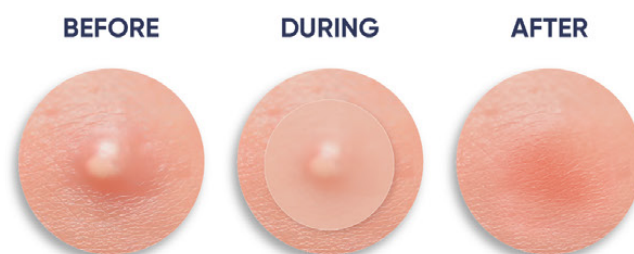

• FEATURES

Healing pimples in as little as 6 hours. Absorbs excess fluid and helps reduce inflammation. Creates a protective barrier to support the wound repair process. Prevents pimple popping and picking. Moisturizing, hypoallergenic, and safe for sensitive skin.

Absorb Exudate and Protect the Wound

The hydrophilic particles of hydrocolloid can form a semi-solid substance similar to gel, which is attached to the base of the wound to provide and maintain a moist environment conducive to wound healing

OEM Natural Ingredients

Match Your Mode,
Not Your Breakout

The colored acne patches combine advanced hydrocolloid technology with vibrant, fashion-forward design to offer an effective and expressive solution for acne care.

Formulated to gently absorb excess oils and impurities, and accelerate the healing process while creating a protective barrier against bacteria and external irritants.

It comes in a range of vivid, dermatological tested colors that allow users to personalize their skincare routine and embrace their individuality—without hiding behind a breakout. Whether worn under makeup or as a bold statement on their own, These colored patches are designed to blend science with self-expression, empowering users to face the day with confidence.

What is a microneedle acne patch?

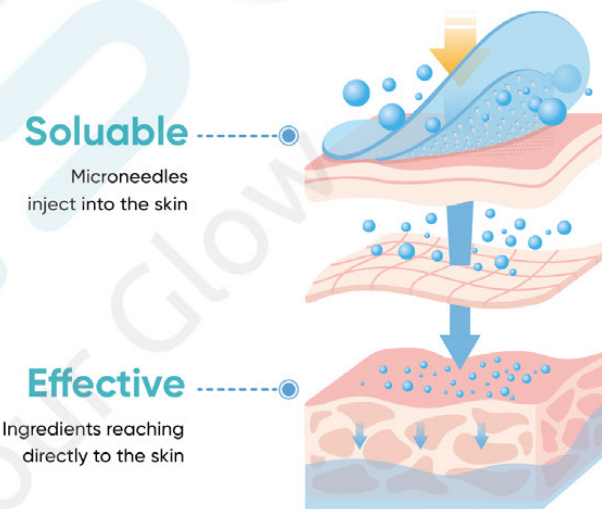

Microneedle acne patches are an advanced skincare solution designed to effectively target and treat acne lesions. Utilizing dissolvable microneedle technology, these patches deliver active ingredients such as salicylic acid or hyaluronic acid directly into the skin, enhancing absorption and promoting faster healing. The ultra-thin, transparent design ensures comfortable, discreet wear for both daytime and overnight use. By creating a protective barrier, the patch prevents bacterial contamination and discourages picking, while the microneedles gently exfoliate and improve skin texture. Suitable for all skin types, this innovative approach offers a targeted, non-irritating treatment for clearer, healthier-looking skin.

DMN

Technology Principle:

The DMN (Dissolvable Microneedle) technology involves fabricating micro-scale needle-like structures from macro-molecular drugs or active ingredients. Upon application to the skin through patch-based contact, these microneedles create numerous microscopic pathways across the stratum corneum, thereby facilitating the transdermal delivery of the drug into the underlying tissues and enhancing its systemic or localized absorption.

The Difference Between Microneedle and Ordinary Acne Patch

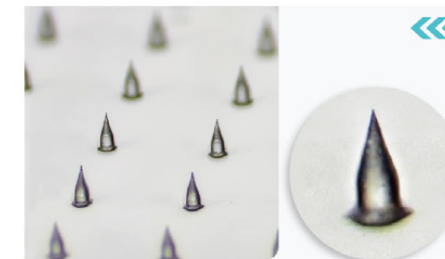

• Micro Scale Carrier

No need for injection, no need for foreign object rolling needles. With the help of hyaluronic acid as a safe carrier, directly and efficiently deliver active ingredients to deep skin layers.

• Solid Essence

Add functional ingredients such as hyaluronic acid, solidify into microcrystals that dissolve in water.

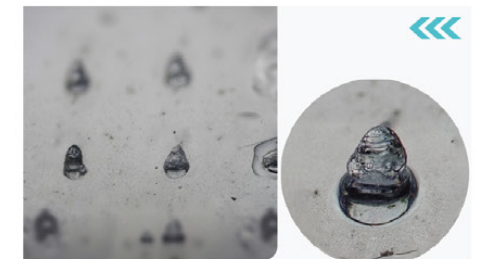

»»» Before use

The microneedles are arranged in a complete manner, and the needle

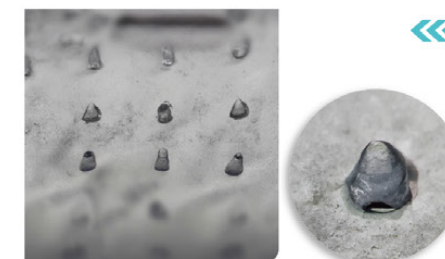

»»» Use for 10 minutes

Needle body dissolves 20%

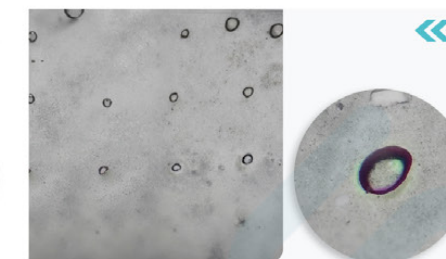

»»» Use for 20 minutes

Needle body dissolves 40%

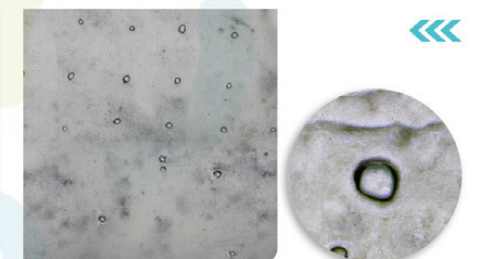

»»» Use for 30 minutes

Needle body dissolves 45%

»»» Use for 60 minutes

Needle body dissolves 95%

»»» Use for 90 minutes

Needle body dissolves 100%

Microcrystal dissolution test

Dissolution rate reaches More than 90% after 60 minutes of use. The rate of dissolving microcrystals in male and female skin is different, but after 90 minutes of application, the average dissolution rate is 98%.

• Asiaticoside •

soothe redness and reduce post-acne marks.

• Dipotassium Glycyrrhizate

Soothes inflammation and calms the skin.

• Salicylic Acid •

penetrates pores to tighten them, control oil production, and alleviate inflammation.

• Sodium hyaluronate

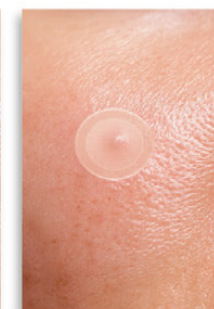

replenishes lost moisture and supports skin repair, restoring the skin's protective barrier.

We have obtained CE & ISO 13845 certificate, some products are registered at FDA of United States.

BEFORE

DURING

AFTER

Acne patch

INSTRUCTION FOR USE:

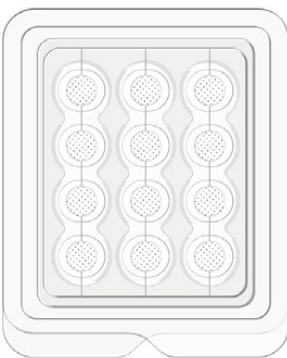

- STEP1:** Clean the affected area with a gentle cleanser, and pat dry. Make sure the skin is clean and free of oils or lotions.
- STEP2:** Remove one patch from the tray, avoiding direct contact with the micro-needle area to maintain hygiene
- STEP3:** Place the micro-needle patch gently onto the pimple or acne spot. Press lightly for about 5 seconds to ensure good adhesion and full absorption of active ingredients.
- STEP4:** 4. For best results, leave the patch on for at least 6-8 hours, or overnight.

FEATURES:

Utilizing dissolving microneedle technology, the acne patch delivers active ingredients directly into the skin to target acne at its source. Effectively reduces redness, swelling, and inflammation of existing pimples within hours. Controls excess oil and improves overall skin texture, leaving the complexion clear and radiant.

IDEAL FOR FOLLOWING STAGES:

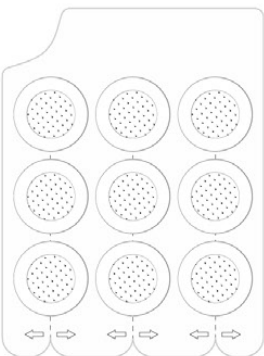

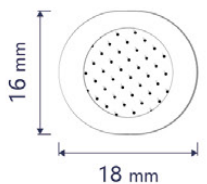

1. Early to Mid-Stage Inflammatory Acne
2. Post-Inflammatory Hyperpigmentation (PIH)
3. Mild to Moderate Nodules and Cysts

Spot-Lightening Patch

INSTRUCTION FOR USE:

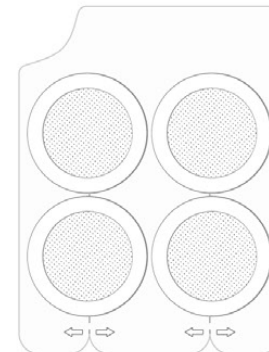

- STEP1:** Wash the face and dry it thoroughly. Ensure the skin is free of oils or moisturizers before application.
- STEP2:** Take out one patch from the tray carefully, avoiding touching the micro-needle part to keep it clean and effective.
- STEP3:** Apply the micro-needle patch gently onto the dark spot. Press lightly for 5 seconds to help it adhere well and release the active ingredients into the skin.
- STEP4:** Get it changed as needed.

NOTE:

It is recommended to use mild and non-irritating skin care products and avoid using products containing irritating ingredients Applicable groups

FEATURES:

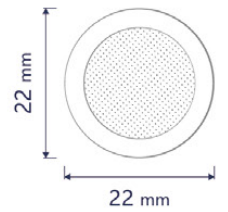

1. Reduces the appearance of acne marks, sunspots, or uneven skin tone over time.
2. Helps control excess pigment formation to prevent new dark spots from forming.
3. Encourages faster turnover of skin cells to reveal brighter, more even-toned skin.
4. Concentrates active ingredients (like vitamin C, arbutin, tranexamic acid) directly to the affected area for better effectiveness.

CODE: HA 410
SIZE: 22×22 mm
QTY: 4 Dots

MAIN INGREDIENTS:

sodium hyaluronate, melatonin, gaba, escin.

Anti-Wrinkle Patch

INSTRUCTION FOR USE:

- STEP1:** Clean the under eye area and keep dry.
- STEP2:** Remove one patch from the tray, avoiding direct contact with the micro-needle area to maintain hygiene
- STEP3:** Place the micro-needle patch gently onto under-eye area. Press lightly for about 5 seconds
- STEP4:** Keep it for 90 minutes or overnight.

NOTE:

Due to the different degree of personal skin absorption, patch part will have a small amount of hyaluronic acid residue. It is normal. Please use essence of water or serum to dissolve it. If you feel a foreign sensation or slight redness after use, it is normal. The discomfort usually subsides within a few minutes.

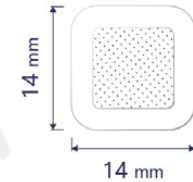

FEATURES:

1. Delays cell aging, boosts cell regeneration, and stimulates collagen production for comprehensive anti-wrinkle effects from within.
2. Speeds up skin repair, fills in fine lines and dry wrinkles, and helps reduce under-eye bags.

CODE: HA 408
SIZE: 14×14 mm
QTY: 9 Dots

MAIN INGREDIENTS:

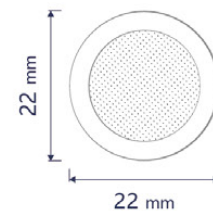

sodium hyaluronate, glutathione, 3-o-ethyl ascorbic acid, niacinamide.

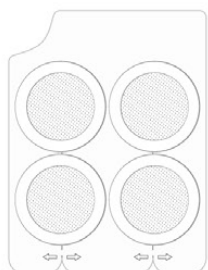

CODE: HA 409
SIZE: 22×22 mm
QTY: 4 Dots

MAIN INGREDIENTS:

sodium hyaluronate, glutathione, 3-o-ethyl ascorbic acid, niacinamide.

Sleep Aid Patch

INSTRUCTION FOR USE:

- STEP1:** Take out one patch from sheet, avoiding touching the microneedle area.
- STEP2:** Press the patch onto the desired area (wrist or behind the ear) for 5 seconds until no white bubbles remain. For best results, wear for 8 hours.
- STEP3:** After use, remove the patch and clean the area thoroughly.

NOTE:

It is recommended to use mild and non-irritating skin care products and avoid using products containing irritating ingredients Applicable groups

RECOMMEND FOR:

1. People who need to adjust their time zone quickly or have disrupted sleep schedules due to holidays.
2. People who work alternating night and day shifts.
3. People with Delayed Sleep Phase Syndrome (DSPS), whose sleep and wake times are shifted later.
4. People with sleep-wake rhythm disorders caused by insufficient melatonin secretion.

CODE: HA 411
SIZE: 21×50 mm

CODE: HA 412
SIZE: 19×49 mm
QTY: 2 Dots

MAIN INGREDIENTS:

sodium hyaluronate, ectoin, acetyl tetrapeptide-5, acetyl hexapeptide-8.

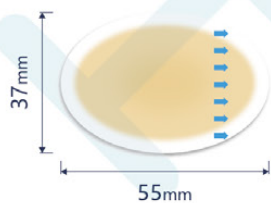

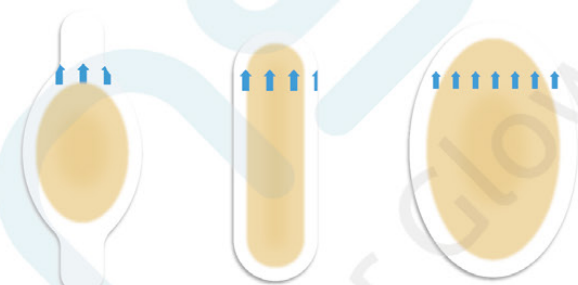

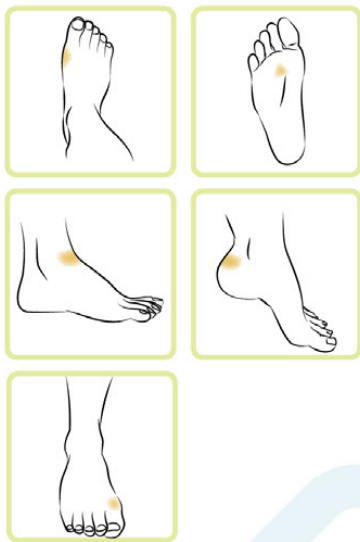

Blister Plaster

Blister plaster is made of adhesive hydrocolloid and high-permeability PU film, without any medicinal ingredient. Inner layer provides moist wound treatment environment. Outer layer is waterproof, bacteria-proof, soft, comfortable and breathable. Available in different shapes and sizes to provide comprehensive protection.

PRODUCT INDICATIONS

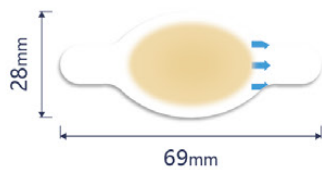

- SKIN BLISTERS AND CORN DUE TO VARIOUS REASONS.
- SMALL WOUNDS OF THE SKIN DUE TO ACUTE AND CHRONIC INJURIES.
- PREVENTIVE PROTECTION IN THE FRICTION-PRONE SITES ON APOPHYSIS OF THE FOOT.
